

Tip Tap

UNIQUE LUBRICATING AGENT FOR METALWORK

- ✓ For all kinds of metalwork such as cutting, drilling, tapping and milling.
- ✓ Lubricating and cooling action.
- ✓ Prevents tools from seizing, increasing their life.
- ✓ Prevents drill shattering.
- ✓ Economical to use.
- ✓ Stays where sprayed.
- ✓ Jet spray nozzle to reach difficult areas.

Technical Info

- Appearance: aerosol.
- Base: mineral oils and additives.
- Colour: clear, light yellow.
- Flashpoint of active agent: 180°C.
- Density: 0.8 +/- 0.1 kg/dm.
- Flammability: very easily flammable.
- Shelf life: 36 months, keep dry, cool and frost-proof.
- Safety measures: consult the Safety Data Sheet.

Packing

Tip Tap - aerosol 400ml

Product

Characteristics

- Specially developed cutting liquid for every form of metalworking such as tapping, wire cutting, drilling, sawing, milling, Controlled lubrication and practically immediate cooling increase the life span of tools and improve the processing result.
- A universal product, for use both to process the hardest anti-rusting steel such as stainless steel, etc. as well as softer metals such as aluminium, brass or copper.
- Economical to use, does not drip and does not flow away, even when applied to curved surfaces. There is no loss due to spillage, dripping or evaporation. Tip Tap cools and lubricates.

Use

Sawing metal: just spray along the cutting edge.

Drilling into metal: spray directly onto the position being drilled.
